

AI-Based Head Counting & Group Weight Measurement Service

edgefarm Count

Instant headcount & weight on the move.

edgefarm count provides AI weight estimation. Follow guidelines and supply data for precision.

*Headcount: Displays when a pig fully crosses the red center line.

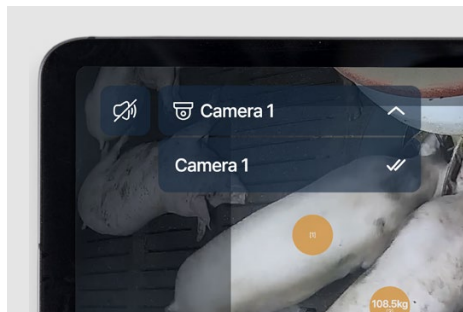

*Individual Weight (For finishers): Displays when a pig leaves the screen.

Why edgefarm Count?

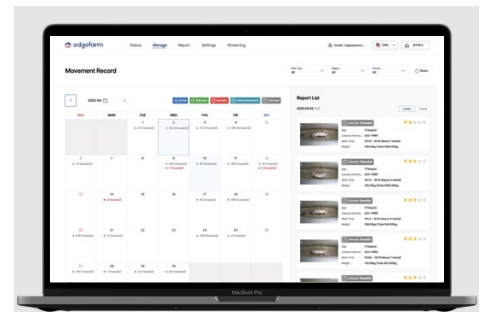

Fast & Easy Access

Scan the QR code for instant dashboard access. Place QR codes wherever needed, like workspaces or offices.

Cost-Effective Scalability

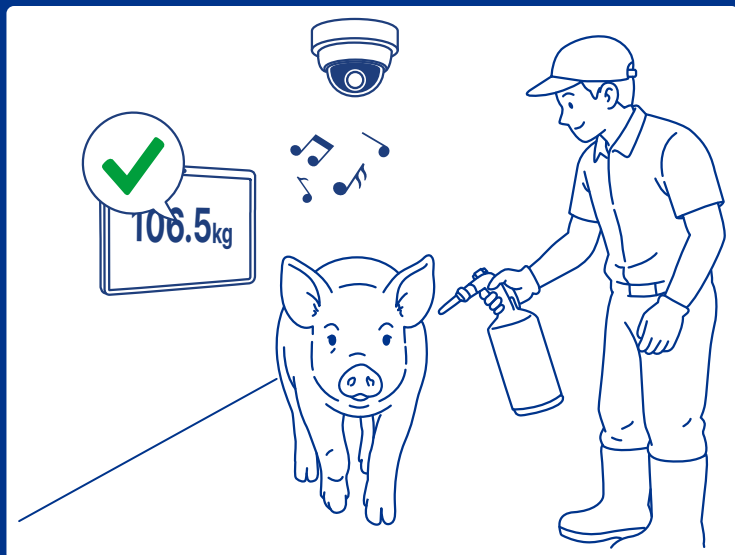

Manage up to 8 locations with a single device. Add cameras where needed. (extra fees apply)

Automated Movement Records

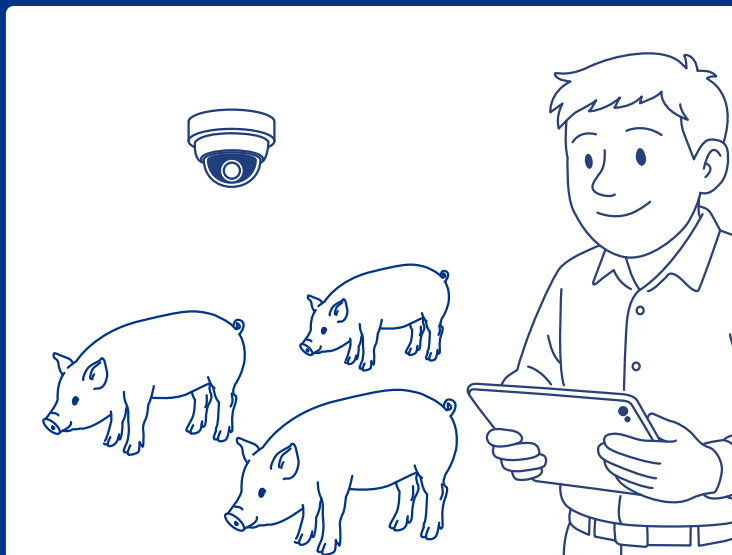

Automates movement tracking. Check real-time traffic, then review or download the recorded video.

How to Use

✓ Listen to audio for sorting decisions.

Install in high-traffic finisher corridors. When a pig hits the target weight and passes underneath, edgefarm count plays an alert.

✓ Check pig movement counts in real time.

A report is generated whenever pigs pass under the camera, showing their estimated average weight and head count.

Customer Reviews

Farm Operator

"What a relief!" No more counting pigs one by one

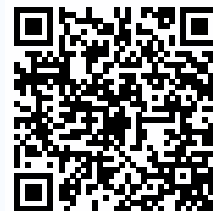

We usually move 40+ pigs at once. Counting them manually in the pen used to take forever. Now with edgefarm, we don't count anymore, cutting labor time drastically.

Abattoir Foreman

"Highly Recommended"

We used to have two people count and compare, but disagreements always caused confusion. edgefarm count completely solves this, making it a huge help for field workers.
